

# Lesson 1: Let's Think

**In Class 6Y there are 24 pupils.**

**A fraction of the class are taking part in a chess tournament.**

**What possible fraction of the class could be attending the tournament?**

**How many pupils would this be?**

# Lesson 1: Let's Apply

**At Phil's Phones, the price labels are a little different than normal.**

**PHONE A**

$\frac{2}{3}$  of £69

**PHONE B**

$\frac{8}{10}$  of £60

**PHONE C**

$\frac{6}{9}$  of £63

**Put the phones in order from cheapest to most expensive.**

## Lesson 2: Let's Think

**The white lines on a motorway need repainting.**

**The motorway is 200km long and so far the contractors have painted  $\frac{4}{5}$  of the length.**

**What length of the motorway still needs to be painted?**

## Lesson 2: Let's Apply

**Ola buys a notebook for £1.65 and a pen for £1.35.**

**She has  $\frac{1}{4}$  of her money left.**

**How much money did she have to start with?**
